13. PHP CAPTCHA
14. PHP XML Handling
15. PHP PDF Handling
16. PHP COM Handling
17. PHP Payment Gateways
18. PHP Ajax

**Level 5: CMS Training in PHP**

A content management system is software that keeps track of every piece of content on your Web site; much like your local public library keeps track of books and stores them. Content can be simple text, photos, music, video, documents, or just about anything you can think of. A major advantage of using a CMS is that it requires almost no technical skill or knowledge to manage. Since the CMS manages all your content, you don't have to.

**Level 6: Live Projects**

This level will provide the students with the 'hands-on' experience; an active involvement with live international projects under the guidance of the industry experts alongside the company's working professionals.

**Projects to Be Covered Like:**

- # Industry Level
- # Forums # Blogs
- # Youtube
- # CRM
- # Flicker
- # Orkut
- # Shopping Cart
- # Rapidshare

**On completion of this course you will be provided with great interview opportunities.  
Based on your performance during training.**
